DETAILED ACTION

Allowable Subject Matter

1. Claims 1-18 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The Applicant's remarks stated on pages 3-4 and the cited in the previous Office Action were carefully reviewed. As the results, claims 1-18 are allowed with the followings reasons:

The prior art of record fails to clearly teach a broadband network termination apparatus for coupling a premises network to a broadband network and provide broadband data services to the premises network, comprising, inter alia, a processor operably programmed for providing at least one of installation and test menus to a test set using inbound Caller-ID compatible signaling, and for receiving user response input from the test set using outbound DTMF signaling, as substantially described and connected to claim 1.

The prior art of record also fails to clearly teach a broadband network termination system comprising, inter alia, a test set comprising a display and a user input, the test set operable for receiving inbound Caller m-compatible signaling carrying said at least one of installation and test menus and converting the received Caller m-compatible signaling into a user-readable output via the display, and further operable for responding to said signaling by forwarding a user selection via the user input to the network termination device, as substantially described and connected to claim 5.

Art Unit: 2643

Finally, the prior art of record fails to clearly teach a method for setting up a network termination between a broadband network and a premises network comprising the steps of, inter alia, providing an access code to the network termination device via the test set device, and sending a response from the network termination device to a user of the test set device via a display operable for displaying Caller m-compatible data on the test set device, as substantially described and connected to claim 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
